Features

- Pin Locking Mechanism - Sockets are secured for 'Working at Height' with a pin locking mechanism which requires the use of a Pin Removal Tool to attach and remove sockets. The pin locking mechanism ensures zero drops.
- Permanent Attachment Points - All 3/4" socketry tools feature permanent shackle attachment points that allow for full tool functionality.
- Metric or Imperial – Each Kit comes with X 22 Metric or Imperial sockets.
- Engraving – All tools come laser engraved with your choice of identifier including 12 to 13 letters and/or numbers, for example: the rig name, team name or department. Lid foams can also be customised to suit your requirements.
- Tool Control Foam – Both kits feature double colour tool control foam, making it easy to manage your inventory.
- Mobile Tool Box – The tough black tool box features wheels, handles and clip locks for easy transportation.
